HIGHER LEVEL FX™

Our goal is to help individuals and charities all around the world while giving assistance to communities filled with people who are eager to educate themselves and make a difference in their lives by benefiting from the financial markets.

ALPHA

Alpha was built on proven strategies from professional traders. Its goal is to find the right entry and exit points while at the same time calculating the lot size, order type, and reacting to changing market conditions.

It does all of this in real time on a demo account using fake money, so you get to see real trading in action without any money being risked! It has customizable settings so that you can experiment and see what the results are.

Alpha uses multiple strategies that make up its trading style.

This software relies on:

- candlestick patterns
- momentum
- support and resistance
- adr (average daily range)

It helps you to trade without human emotion and it uses the gravity index as it's main confirmation to identify and trade only when a "gravity switch" aka. "reversal" appears in the market.

ALPHA

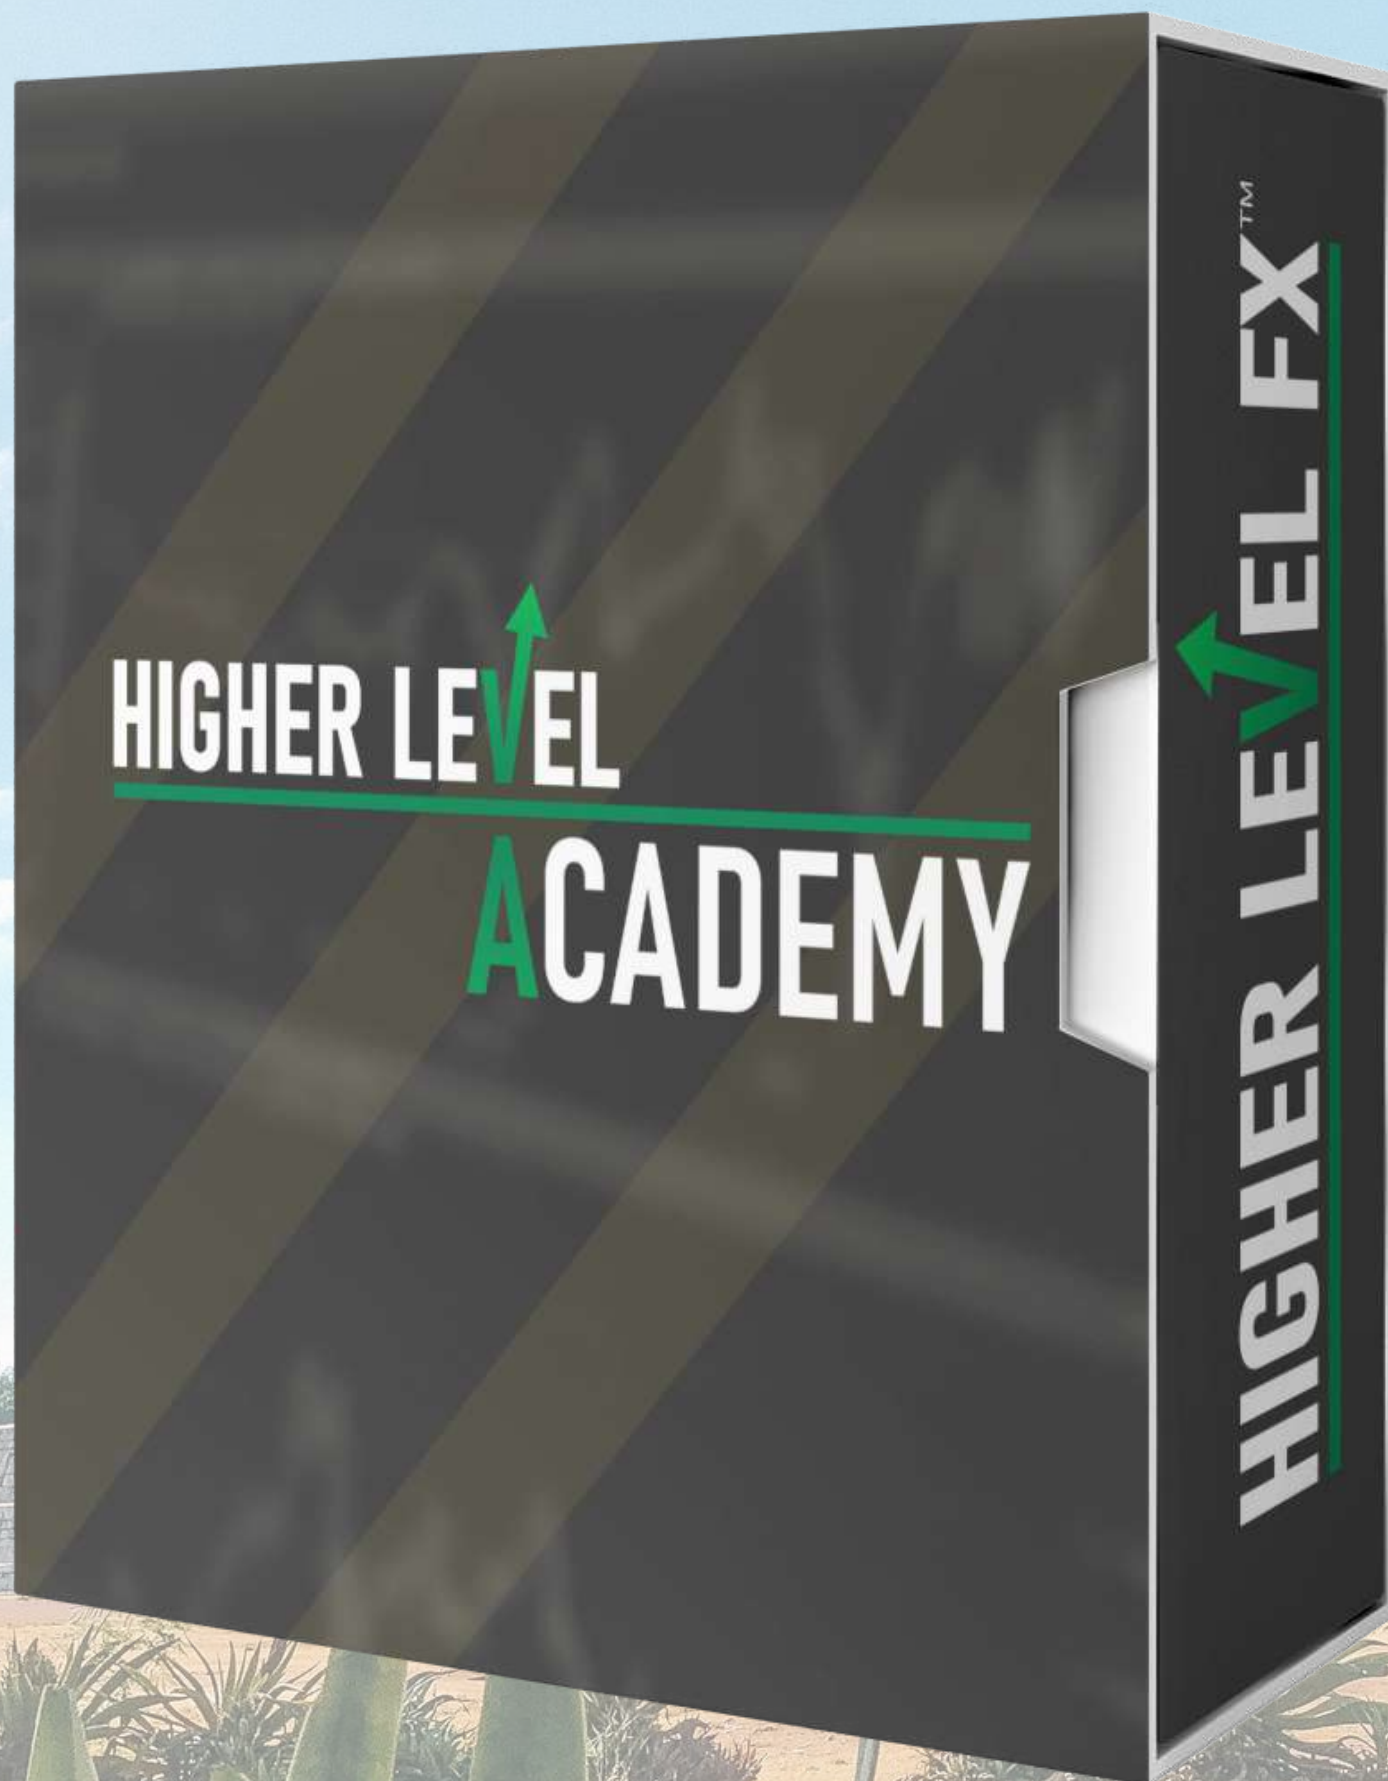

With Alpha as your guide, you can now learn a new skill set that will teach you how to become a better trader and to be able to face the foreign exchange market with confidence.

After learning with alpha you will have a serious advantage over 90% of retail forex traders.
